## Use of Non-GAAP Financial Information

This press release contains information about Aptiv's financial results which are not presented in accordance with GAAP. Specifically, Adjusted Revenue Growth, Adjusted Operating Income, Adjusted Net Income, Adjusted Net Income Per Share and Cash Flow Before Financing are non-GAAP financial measures. Adjusted Revenue Growth represents the year-over-year change in reported net sales relative to the comparable period, excluding the impact on net sales from currency exchange, commodity movements and divestitures. Adjusted Operating Income represents net income before interest expense, other income (expense), net, income tax expense, equity income (loss), net of tax, restructuring, other acquisition and portfolio project costs, asset impairments, gains (losses) on business divestitures and deferred compensation related to acquisitions. Other acquisition and portfolio project costs include costs incurred to integrate acquired businesses and to plan and execute product portfolio transformation actions, including business and product acquisitions and divestitures. Adjusted Operating Income margin is defined as Adjusted Operating Income as a percentage of net sales.

Adjusted Net Income represents net income attributable to Aptiv before restructuring and other special items, including the tax impact thereon. Adjusted Net Income Per Share represents Adjusted Net Income divided by the weighted average number of diluted shares outstanding for the period. Cash Flow Before Financing represents cash provided by operating activities from continuing operations plus cash provided by (used in) investing activities, adjusted for the purchase price of business acquisitions and net proceeds from the divestiture of discontinued operations and other significant businesses.

Management believes the non-GAAP financial measures used in this press release are useful to both management and investors in their analysis of the Company's financial position, results of operations and liquidity. In particular, management believes Adjusted Revenue Growth, Adjusted Operating Income, Adjusted Net Income, Adjusted Net Income Per Share and Cash Flow Before Financing are useful measures in assessing the Company's ongoing financial performance that, when reconciled to the corresponding GAAP measure, provide improved

comparability between periods through the exclusion of certain items that management believes are not indicative of the Company's core operating performance and that may obscure underlying business results and trends. Management also uses these non-GAAP financial measures for internal planning and forecasting purposes.

Such non-GAAP financial measures are reconciled to the most directly comparable GAAP financial measures in the attached supplemental schedules at the end of this press release. Non-GAAP measures should not be considered in isolation or as a substitute for our reported results prepared in accordance with GAAP and, as calculated, may not be comparable to other similarly titled measures of other companies.

**RECONCILIATION OF NON-GAAP MEASURES**  
**(Unaudited)**

In this press release the Company has provided information regarding certain non-GAAP financial measures, including “Adjusted Revenue Growth,” “Adjusted Operating Income,” “Adjusted Net Income,” “Adjusted Net Income Per Share” and “Cash Flow Before Financing.” Such non-GAAP financial measures are reconciled to their closest GAAP financial measure in the following schedules.

**Adjusted Revenue Growth:** Adjusted Revenue Growth is presented as a supplemental measure of the Company’s financial performance which management believes is useful to investors in assessing the Company’s ongoing financial performance that, when reconciled to the corresponding U.S. GAAP measure, provides improved comparability between periods through the exclusion of certain items that management believes are not indicative of the Company’s core operating performance and which may obscure underlying business results and trends. Our management utilizes Adjusted Revenue Growth in its financial decision making process, to evaluate performance of the Company and for internal reporting, planning and forecasting purposes. Adjusted Revenue Growth is defined as the year-over-year change in reported net sales relative to the comparable period, excluding the impact on net sales from currency exchange, commodity movements and divestitures. Not all companies use identical calculations of Adjusted Revenue Growth, therefore this presentation may not be comparable to other similarly titled measures of other companies.

**Adjusted Operating Income:** Adjusted Operating Income is presented as a supplemental measure of the Company's financial performance which management believes is useful to investors in assessing the Company's ongoing financial performance that, when reconciled to the corresponding U.S. GAAP measure, provides improved comparability between periods through the exclusion of certain items that management believes are not indicative of the Company's core operating performance and which may obscure underlying business results and trends. Our management utilizes Adjusted Operating Income in its financial decision making process, to evaluate performance of the Company and for internal reporting, planning and forecasting purposes. Management also utilizes Adjusted Operating Income as the key performance measure of segment income or loss and for planning and forecasting purposes to allocate resources to our segments, as management also believes this measure is most reflective of the operational profitability or loss of our operating segments. Adjusted Operating Income is defined as net income before interest expense, other income (expense), net, income tax expense, equity income (loss), net of tax, restructuring and other special items. Not all companies use identical calculations of Adjusted Operating Income, therefore this presentation may not be comparable to other similarly titled measures of other companies. Operating income margin represents Operating income as a percentage of net sales, and Adjusted Operating Income margin represents Adjusted Operating Income as a percentage of net sales.

**RECONCILIATION OF NET EARNINGS TO ADJUSTED EARNINGS**  
**(Unaudited)**

**Adjusted Net Income and Adjusted Net Income Per Share:** Adjusted Net Income and Adjusted Net Income Per Share, which are non-GAAP measures, are presented as supplemental measures of the Company's financial performance which management believes are useful to investors in assessing the Company's ongoing financial performance that, when reconciled to the corresponding U.S. GAAP measure, provide improved comparability between periods through the exclusion of certain items that management believes are not indicative of the Company's core operating performance and which may obscure underlying business results and trends. Management utilizes Adjusted Net Income and Adjusted Net Income Per Share in its financial decision making process, to evaluate performance of the Company and for internal reporting, planning and forecasting purposes. Adjusted Net Income is defined as net income attributable to Aptiv before restructuring and other special items, including the tax impact thereon. Adjusted Net Income Per Share is defined as Adjusted Net Income divided by the weighted average number of diluted shares outstanding for the period. Not all companies use identical calculations of Adjusted Net Income and Adjusted Net Income Per Share, therefore this presentation may not be comparable to other similarly titled measures of other companies.

**Cash Flow Before Financing:** Cash Flow Before Financing is presented as a supplemental measure of the Company's liquidity which is consistent with the basis and manner in which management presents financial information for the purpose of making internal operating decisions, evaluating its liquidity and determining appropriate capital allocation strategies. Management believes this measure is useful to investors to understand how the Company's core operating activities generate and use cash. Cash Flow Before Financing is defined as cash provided by operating activities from continuing operations plus cash provided by (used in) investing activities, adjusted for the purchase price of business acquisitions and net proceeds from the divestiture of discontinued operations and other significant businesses. Not all companies use identical calculations of Cash Flow Before Financing, therefore this presentation may not be comparable to other similarly titled measures of other companies. The calculation of Cash Flow Before Financing does not reflect cash used to service debt, pay dividends or repurchase shares and, therefore, does not necessarily reflect funds available for investment or other discretionary uses.
